

Shubham Jain

Full-Stack & Backend Engineer · AI-Native & Agentic Engineering · .NET | Angular | PostgreSQL | Azure

Bengaluru, India | +91 94069 00025 | shubhamjainiitb@gmail.com | linkedin.com/in/shubham-jain-developer

Full-stack and backend engineer with 5 years spanning large-scale government infrastructure and early-stage startup engineering. Led backend architecture for a statewide platform serving **69M+ residents** and **15M+ daily API requests**, and currently a founding engineer at an AI-native healthcare startup, directing AI agents within a human-in-the-loop model. Strong foundation in .NET, Angular, distributed systems and database optimisation, with proven ability to lead teams and ship reliable software in regulated environments.

PROFESSIONAL EXPERIENCE

Founding Software Engineer May 2026 – Present
Synexar, Inc. · Bengaluru, India (Remote)

- Built and delivered full-stack features using .NET, Angular, PostgreSQL and Azure — including SSO login optimisation, centralised audit logging and reusable UI components — spanning backend APIs, frontend and database engineering.
- Operated within a human + AI agentic engineering model, directing AI agents to execute development, debugging, refactoring and testing while owning technical direction, requirements, architecture and validation.
- Contributed to a structured AI-agent workflow covering change-impact analysis, implementation and local verification, strengthening the reliability of AI-agent-driven development.
- Delivered and stabilised a hospital front-office (reception) intake feature, resolving data-persistence issues and integrating **Azure OCR** to extract patient details from driving licences and insurance cards.
- Led core restructuring of the platform's multi-tenant architecture, redesigning master tenant tables and implementing **Row-Level Security (RLS)** for stronger data isolation.
- Implemented end-to-end test coverage using Playwright for post-deployment validation and automated regression verification.

Software Engineer Apr 2025 – Apr 2026
Center for Smart Governance, Government of Karnataka · Bengaluru, India

- Architected and optimised backend microservices for **Kaveri 2.0**, a statewide property-registration platform serving 69M+ residents and 15M+ daily API requests, achieving a **70% reduction** in API latency and database query execution time through schema redesign, indexing strategy and query optimisation.
- Designed scalable, idempotent REST APIs using .NET Core microservices, ensuring transactional integrity, fault tolerance and high availability for 9,000+ daily property registrations, supporting ₹20,000+ crore in annual government revenue.
- Implemented secure authentication and authorisation using JWT, RBAC, API keys, schema validation and Redis rate limiting, ensuring compliance and auditability for 40,000 DAU / 900,000 MAU in a highly regulated environment.
- Developed Azure DevOps CI/CD pipelines for automated deployment, testing and monitoring of high-availability microservices.
- Led a team of 4 developers with end-to-end ownership of multiple critical microservices, delivering on schedule with **zero major incidents**.

Associate Software Engineer Jun 2023 – Mar 2025
Center for Smart Governance · Bengaluru, India

- Developed .NET APIs and Angular applications for core property-registration workflows, including reactive forms and lazy loading, for a 40,000-DAU user base.
- Single-handedly designed and launched an in-house **360° Feedback application** (.NET Core MVC, Angular, MySQL) with role-based authentication, enabling peer and upward feedback for 500+ users — earning two promotions.

Junior Software Engineer Aug 2021 – May 2023
Center for Smart Governance · Bengaluru, India

- Developed Angular applications, .NET backend services and REST APIs for government technology solutions.

TECHNICAL SKILLS

Languages	C#, SQL, TypeScript, Python
Backend	REST APIs, Microservices, Distributed Systems, System Design & Architecture, Multi-Tenant Architecture, Authentication & Authorisation (JWT, RBAC), Caching (Redis), Rate Limiting, Idempotency
AI-Native	AI Agent Orchestration, Claude Code, GitHub Copilot, Cursor IDE, Prompt Engineering, Code Review Automation
Databases	PostgreSQL, MySQL, MongoDB, Row-Level Security (RLS), Query Optimisation, Indexing
Cloud & DevOps	Azure, Azure OCR (Cognitive Services), Azure DevOps, CI/CD, Docker
Frontend & Test	Angular, AngularJS, HTML, CSS, Playwright

EDUCATION & CERTIFICATIONS

Master's Degree, Computer Programming — International Institute of Information Technology, Bangalore Jun 2016 – Apr 2021 (IIIT-B)

Integrated M.Tech, Electronics & Communication · Bengaluru, India

Systems Design Assessment — AlgoExpert 2025 **Microsoft SSRS** — Udemy 2021
